

The Contractor Opportunity System is a single point of interaction for contracting officers, procurement team staff, and vendors that provides a customizable acquisition workflow engine. With a secure posting portal and collaboration technology, you can ensure that all vendors are able to receive opportunity postings, and view questions and answers, and then manage their response. No more late submissions, fewer protests, and flawless tracking of every activity.

Dashboard View

Opportunity Dashboard

single view of all critical information | announcements | deadlines

Communications Management

staging (SSN, RFI, RFP, etc) | response metrics | Q&As | track viewers

Document Repository

secure centralized storage | proposal submission receipts | versioning

Secure Access Control

security certificates | stringent password reqs | failed attempt lockout

Customized Viewing

custom branding | email notification configuration | search options

User Roles, Company POC Administration

lists of points of contact/users | user permissions | system metrics

Proven Results

Users have increased productivity because individual acquisition vehicle processes, phases, and standards are integrated into the acquisition workflow. A collaborative workspace is provided for officers and reviewers, tracking interaction and results.

Information assurance is built in to meet DIACAP requirements.

Scalable to meet your agency requirements for vendors, users, procurements and proposal submissions. COS can manage a large volume, up to 100,000 registered vendor users, 50,000 efforts, and 1,000,000 communications per year.

BVTI is a Service-Disabled Veteran-Owned Small Business (SDVOSB) providing acquisition and program management solutions to federal customers since 2002.
